

Why float when you can fly?

RS 600 ff

„Warum RS600ff segeln?

- **Aktueller Top-Speed von 23.4 knots** „set by Sam Pascoe in Feb 2007. Sam's speed record in the Moth is 26 knots, but he says: „I think the RS600FF will be faster....“
- **Striktes One-Design** „The RS600FF abides by the existing rules of the RS600 class – with the obvious exception of the hydrofoil package. When the racing circuit gets underway, sailors will not be allowed to customise their boats. The RS600FF is all about cost-effective foiling.“
- **Einfaches Einwassern:** „Liftable foils make this the most user-friendly 'foiler' on the market.“
- **Einfacher Umbau:** „In just a few hours you can convert your RS600 so it's ready for foiling. Want to switch back to the RS600 for some conventional sailing? No problem, the foiling package has been designed as a 'bolt-on, bolt-off' package which means you still have your standard RS600 any time you want it.“ (Quelle: <http://www.fullforceboats.com>)

Foilingset (Umbaukit) für bestehenden RS600 zu kaufen bei

Linton Jenkins
Full Force Boats
Telephone: +44 (0)1305 826555.
